

## how to make a bun

If you're not used to making a neat bun, it's a good idea to practice a few times before the day of the show!

### You'll need:

a brush and a comb  
hair gel ("strong hold")  
1 elastic hair tie  
2 bun nets  
12-16 hair pins or bobby pins  
hair spray

1. Thoroughly wet a brush or comb and run it through the hair to remove knots. Then smooth gel over the hair and "fringe" to help hold any stray hairs back from the face.

2. Brush the hair smoothly into a ponytail.

3. Tie the ponytail with an elastic hair tie. Don't make the ponytail too high or too low as in the small photos to the right.

4. Dampen the ponytail with a little water or a wet brush and gather it in your hands.

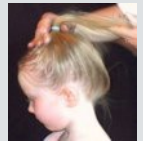

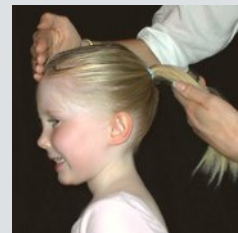

6. Roll the hair into a neat, flat coil and secure it with a few pins.

9. Place on two bun nets. Secure them with more pins around the edge.

10. Lastly spray the whole hairdo with plenty of hairspray and pin the flower on the left side of the bun.

too high!

too low!
